

REAL. SMART. LOGISTICS.

Coyote Logistics is a road freight and transportation management provider that works with shippers in all industries, from Fortune 100 companies to small businesses, via a growing network of transportation providers across all of Europe. Powered by proprietary technology, and smart people, Coyote Logistics is unwavering in its mission to provide the best service in the industry. No Excuses.

In 2015, UPS acquired Coyote Logistics. The acquisition created unique transportation solutions for shippers and transportation providers in Europe and North America. UPS's experience as a leading global transportation provider and vast portfolio, combined with Coyote's advanced technology and road freight expertise created a one-stop shop for shippers and transportation providers alike.

Coyote Logistics offers full, heavy, part, and mega road transport options, including temperature-controlled and ADR services.

TENACIOUS. TRUE. TRIBAL. SMART.

Logistics is at the heart of everything around you. Have you ever thought about how items like your electronics or your groceries get to the store? We are a logistics company owned by UPS, specialising in European road freight. Our main assets are our people, our commitment to unrivaled service, and our technology.

We have offices in Europe and in the UK, with fantastic opportunities for career development. We are always looking for tenacious, dynamic, and smart people to join our team. If you have initiative and instinct to think outside the box, excellent communication skills, and lots of energy, we want you! Join the team.
