.NET Developer

Localization: Wrocław, Opole

What will you be responsible for

Successful candidate will work in the team of skilled colleagues on various solutions based on Microsoft .NET technology.

Most of projects are web-oriented projects for large organizations, we also work on mobile, desktop and purely server-side solutions. During work in our team the candidate can benefit from participating in various projects using variety of technologies.

We value pragmatic, client-oriented approach, team work and eagerness to learn and use new technology in our daily work. We strive to use most recent tools allowing us to develop, refactor, test and deliver solutions with outstanding quality.

What do we require

The candidate should demonstrate knowledge in majority of following areas:

- At least 2 years of experience in .NET Framework (4.5 onwards) and C# programming (VB.Net syntax also welcomed)
- Understanding of good OOD and development practices, ideally connected with experience in using some forms of tests, continuous integration & delivery
- Knowledge of the web technologies: HTML, CSS, JavaScript, front-end technologies like AngularJS, React
- ASP.NET MVC (the newest the better), WebAPI, WCF. WebForms – with the desire to migrate to newer technologies
- Knowledge of desktop/mobile technologies is a plus: WinForms (with the desire to learn WPF), WPF, ideally with some framework providing MVVM pattern and some GUI controls (e.g. DevExpress or Telerik)
- Practical knowledge related to databases: MSSQL or Oracle, knowledge of ORM frameworks like Entity Framework or Hibernate is a plus
- Good analytical, organizational, communication and interpersonal skills
- Languages: good command of English preferred, knowledge of German is considered as an advantage
